TERMITES

Copper Care Wood Preservatives' TENINO Coper Naphthenate label allows for use in protecting wood against Carpenter Ants, Powder Post Beetles, Decay Fungi, Subterranean Termites, Drywood Termites and Wood borers. Helps control shrinking, warping, swelling. Wood treated with TENINO resists mold, mildew, moss.

REMEDIAL

TENINO can be used to protect wood in both remedial and preventive applications. TENINO Copper Naphthenate will protect wood below ground. Use it for posts and siding and to protect lumber an timbers in exterior applications. Use it for end-cut protection to comply with treated wood manufacturer's warranties

FADES TO BROWN

TENINO when applied has a dark green color that will fade with time to brown. Fading is dependent on time, sunlight and weathering. Wood may be permanently darkened. TENINO has a strong petroleum odor and should only be used outside and where it will not be offensive. The odor fades with time. Approved for use on shingles and shakes.

Only 2% copper as metal Copper Naphthenate meets AWPA M-4 standard
